

Elenco buyer AeT updated 26aprile

ID	Company	Nazione	Website	Company Role	Activity description	Turnover	No. Of employees	Topics of interest	PRODUCTS/PROCESSES you need TO IMPROVE	PRODUCTS/PROCESSES/SERVICES you are looking for	REQUIREMENTS
1	Alionax	France	www.alionax.com	CEO	Study of innovative products in racket sports	N/D	5	Lasers, optical, optomechanics and optoelectronics Sensors Artificial vision Robotics Vision systems Laser and optical components Sensors Laser and systems Micro-manufacturing systems Optoelectronic equipment and devices Artificial vision Extrusion Injection / Microinjection Overmoulding	PEEK in extrusion as process, Peek in injection as process	Extrusion, MicroInjection	
2	Anhui Chenyang Rubber & Plastic Co., Ltd	China	chenyang.qipei8.com	General Manager	Anhui Chenyang Rubber & Plastic Co., Ltd was established in May 20032 and was located at Hefei Gangji town next to 206 National Road.Company covers an area of 60000 square meters, construction area of 34000 square meters and has three subsidiaries : (Hefei Chenxing Auto Parts Co., Ltd、 Sichuan Chenyang Rubber Products Co., Ltd and Shanghai Buchen-Technology Co., Ltd) It has total assets of 250 million yuan. Main customers are JAC、 SAIC、 GAC、 Brilliance Auto、 Geely Auto、 Beiqi Foton etc.	50	800	Robots for assembling, manufacturing and process control FMEA (Failure Mode and Effect Analysis) Process control systems Quality control systems Subcontracting - Mechanics & Material transformation Assembly Extrusion Moulding Machining	We are in urgent need to improve the automation of the factory. and we want some information about the application of new materials	1.Industrial automated equipment.(reduce human investment) 2. Help to achieve lightweight materials(carrier,new type of tpv,etc)	
3	Anhui T-dragon Industrial Robotics Co.,Ltd	China		General Manager	Industrial products trading by working with end users and engineering integrator, design and mfg material handling equipment to meet customer demands on productivity and save labors, industrial robotics integration and service, air and gas compressors sell and service, End of line system on testing solution of car plant etc.	6	30	Automation, Robotics, Manufacturing controls, Artificial vision Simulation, Additive manufacturing Testing, Measurements, Quality controls, Maintenance	Products and technology on industrial robotics integration, renew capability and sourcing on used industrial robots, etc	Testing device and system on car new technology such like wheel alignment, 3D testing and LDW, testing device and system on car electronics. High pressure air compressor for ship building (150bar-400bar piston air compressor)	Certifications and project case studies, we will validate how to develop the local market accordingly
4	Guangzhou Karts Mechanical Manufacture Co.,Ltd	China	www.kartsmc.com	General Manager	Assembly lines/machining lines for engine and gear box	21,6	153	Mechatronic components Lasers, optical, optomechanics and optoelectronics Test benches	We would like to have more flexible and automation engine, as well as the assembly lines and machining lines for gear box	1.Test benches (hot test and cold test) for engine and gearbox 2.Electric servo nutrunner, servo pressure cylinders 3.Vision system for robots	
5	Guangzhou Yafine Electronic Technology Co., Ltd	China	WWW.YAFINE.CN	System Integrator	We are focusing on electromechanical integration business,therefore our involved field are paper manufacturing, tobacco, mechanical equipment manufacturing ,and food&beverage etc. So, we can offer kinds of solutions for automation components, system integration, and production line engineering.	3	80	Machine tools and special tools, Special Materials Machining Automation, Robotics, Manufacturing controls, Artificial vision	We are looking for the mechanical involved into electromechanical integration system, electronic components, related technical solutions. For example: sensors, timing belt, axle, flexible cables and mechanical design for machineries and production lines.	sensors, timing belt, axle, flexible cables for machineries and production lines	
6	WALLY CAR	Tunisia	www.wallyscar.com		Automobile production	8	28	Robots for assembling, manufacturing and process control Traceability Moulding Overmoulding	Seats, exterior + interior mirrors, exterior lights, hooks system, window system, wiper system.	Increase capacity production. NOTE: l'azienda ha in programma un'ampliamento degli spazi produttivi e prevede l'acquisto di nuove linee e l'aumento dei dipendenti.	
7	Wuhan Jiahexing Technology Co.,Ltd	China	www.whjhxkj.com	President	Industrial controlling products trading with OEMs, end users, system integration service for customer engineering etc.	1,5	50	Machine tools and special tools, Special Materials Machining Automation, Robotics, Manufacturing controls, Artificial vision Testing, Measurements, Quality controls, Maintenance	electronics device and robotics technology, 3D printing etc.	Products and technology on industrial controlling, and sourcing on MRO market, etc	Yes, kinds of certifications, and new technology that can be available for Chinese market, and also can be used on projects.
8	JAC - ITALY DESIGN CENTER SRL	Italy	www.jac-italy.com/	General Manager	Product design development	5	60	Robots for assembling, manufacturing and process control	3D PRINTER TECHNOLOGIES	LIGHT WEIGHT MATERIALS, MANUAL ROBOTS AND ADDITIVE	
9	BAIC MOTOR LTD	China	www.baicmotor.com	Overseas Team Leader	OEM	15	2000	Automation, Robotics, Manufacturing controls, Artificial vision		-The Software that the designer use to deliver the 3D model. advantage: reduce communication cost with engineering, improve quality and increase efficiency (for example : software Dash Foundry, Mercedes uses this software for 3D design); -high-efficiency software that can draw the dashboard (IP) -high quality supplier for the HMI	
10	Changan Automobile European Designing Center SRL	Italy	www.globalchangan.com	Vice General Manager	Representing the European Designing Center of Changan Auto, Changan Europe is taking care of all activities related to automotive design. Sketch design, Rendering, Virtual and Surface 3D modelling, Feasibility Engineering, R&D research for new technologies and innovation related to car manufacturing. Lighting, UX Activities and Modelling (Styling Model manufacturing, Prototyping, Show-cars)	25	150	Machine tools for special materials machining Lasers, optical, optomechanics and optoelectronics Laser and optical components Machine tools and special tool Dimensional measurement Cam Numerical control CAD - CAE Rapid manufacturing/prototyping by subtractive technology or chips removal Reverse engineering CAD/CAM	Lightweight in Automotive Architecture, innovation in processes ,technologies and materials, Electric energy harvesting and storage systems in automotive dynamics.	New materials research (for C&T and Interiors), Rapid Prototyping competences (3d Print), Scanning tools and other)	
11	APIA	Tunisia	www.apia.com.tn	Direttore centrale promozione	Promozione e gestione investimenti privati nell'agricoltura, pesca, veterinaria e laboratori per suddette attività	30	250	Production control Lasers, optical, optomechanics and optoelectronics Process control systems Quality control systems Sensors Optoelectronic equipment and devices Sensors Instruments Calibration Electric and electronic testing Tools and equipment for diagnostics and measurement Fluid Dynamic Simulation (CFD) Virtual testing Microscopy	Ricerca strumenti di laboratorio per agricoltura, pesca, veterinaria (analisi acqua e fluidi, analisi batteriologiche, analisi dimensionali ecc)	Strumenti di laboratorio, apparecchiature per automazione, processi di selezione e trasformazione	Interessati solo a strumenti di laboratorio certificati a livello internazionale
